

Bottomline Technologies provides collaborative payment, invoice and document automation solutions to corporations, financial institutions and banks around the world. The company's solutions are used to streamline, automate and manage processes involving payments, invoicing, global cash management, supply chain finance and transactional documents. Organizations trust these solutions to meet their needs for cost reduction, competitive differentiation and optimization of working capital.

Serving industries such as financial services, insurance, health care, technology, communications, education, media, manufacturing and government, Bottomline provides products and services to approximately 80 of the Fortune 100 companies and 70 of the FTSE (Financial Times) 100 companies.

Junior SQA Engineer

Summary:

Bottomline Technologies is seeking a smart, highly-motivated individual to work as a junior SQA Engineer. You'll work in conjunction with our QA and Development teams to assist in the general functional testing of client/server and web products. You will gain experience in QA and will learn how software projects are scheduled, designed, implemented, tested, and delivered to customers from a quality assurance perspective.

As an SQA Engineer, you'll quickly become an expert with Bottomline's solutions and our target market. The SQA Engineer will use that knowledge to facilitate the growth of our product suite. The job will be very demanding, and will offer the winning candidate a unique fast track career.

Requirements:

- Responsible for maintaining software quality levels for the product on all supported system configurations.
- Qualify all new features by testing on supported platforms.
- Write and maintain test cases, and execute regression test cases.
- May be responsible for executing automated tests during the release cycle.
- Verifying daily builds with acceptance tests, tracking bugs, participating in development meetings, and tracking coverage reports for each product.
- Understanding Bottomline's business.

Required Skills:

- Ability to perform tests against Web applications, front-end UI as well as back-end Databases, Application Servers, and Services under multiple operating systems (Unix and/or Windows based)
- Ability to write SQL queries and analyze databases (Oracle, MSSQL, DB2)
- Ability to read code or scripts
- Self-motivated with strong problem-solving skills
- Excellent verbal and written communications skills
- Keen attention to detail and quality
- Knowledge and experience with Microsoft Word and Excel are essential
- Ability to analyze functional specification for completeness
- Understanding of most concepts, practices, and procedures of the industry in which the software is used (financial departments, banks, insurance companies, law firms, etc) is a plus.

Education:

BS or MS in Computer Science or related field OR 1-2 years relevant work experience preferably in banking/finance.

Locations:

The position is located in Bottomline's Portsmouth, NH headquarters.

Bottomline is a participating employer in the Employment Verification (E-Verify) program EOE/AA/M/F/V/D/E-Verify Employer
Bottomline Technologies is an Equal Employment Opportunity and Affirmative Action Employer.

Please Note: Bottomline Technologies does not accept resumes submitted by recruiting firms unless specifically requested by Human Resources. Unsolicited resumes will be ineligible for referral fees.
